ennui v1.0.0 Release notes

Feature List:

- **Facebook-Login-Implementation**
  - The user is able to log in via Facebook, the login unlocks additional Features for the website
- **Facebook-Crawling**
  - After the user logs in our crawling machine "crawls" the pages of the user and loads them automatically into the Database.
- **Events** (all kinds of Facebook-Events)
  - The User is able to:
  - Watch Events (Event-Information, Google-Maps-Location and nearby Taxis)
  - Favorize Events (these will show up in his Favourites-Section) **FB-only**
  - Filter Events (Toggle Radius, change Location and Date, choose Categories)
  - Add Events (create an Event from scratch) **FB-only**
- **Games** (Games created by Users, for Users)
  - The User is able to:
  - Watch Games (How to play, Rating, Required Players)
  - Rate Games (1 to 5 Star-Rating) **FB-only**
- **Mobile-responsive**

Upcoming Features:

- **Offers-Section:** search for permanent free-time offers, filter them and find the one that fits you the best
- **Add Games:** share your own games with the Community
- **ÖBB-Scotty Implementation:** Get your public transport route for every event/offer
- **Calendar Implementation:** Your own personalized calendar with all your favored events, including a reminder
- **Multi-Language-Support:** Enjoy ennui.at in your main tongue
- **Events for you:** get recommended Events based on ones you have already watched (**Diploma thesis)**
